

PROTECT TREES, FORESTS & WILDLIFE HABITAT

Exotic insects and diseases are a major threat to trees, forests, and wildlife habitat. Tree-killing species like emerald ash borer and Asian long-horned beetle can't move far on their own, but they can jump hundreds of miles when people move firewood.

To protect Montana's natural resources,

- Do not bring firewood into Montana
- Burn locally cut firewood
- Encourage fellow outdoorsmen not to move firewood

If you have already brought firewood from out of state, please burn it completely. Do not leave it. Do not take it home with you.

The transportation of invasive insects & diseases on firewood is destroying trees in prime hunting, fishing & recreation areas.

**DONT MOVE
FIREWOOD**
